Overview

With each software release, we work to improve the System for Award Management (SAM) user experience, improve the quality of information available from SAM, and reduce the burden for those wishing to do business with the U.S. Federal government. We do this through a combination of minor enhancements and fixing known issues. This document summarizes the customer-facing changes that were made to the SAM application and database in the development window culminating in the build to production on December 14, 2019.

<tr>
<td>Implemented FAR Case 2018-017: Prohibition on Certain Telecommunications and Video Surveillance Services or Equipment, to the System for Award Management (SAM). Changes include adding FAR provision 52.204-26 and DFAR 252.204.70ZZ to the Reps &amp; Certs and updating the language within FAR 52.212-3 to reflect the new ruling. A new questionnaire added to the FAR Response pages will populate the user selected value within the new provisions, as well as the API and web service output.</td>
