1 Overview

This document summarizes the customer-facing changes that were made to the SAM application and database in the development window culminating in the build to production on January 13, 2013.

2 Release Notes

Description	Reference IDs
Corrected an issue in which, in the Representations and Certifications section pertaining to small business values of some Entity Management registrations, the size standards read "N/A" instead of displaying the standard itself for valid NAICS codes with exceptions. "N/A" will now only be visible when a size standard doesn't apply.	5818, 7045
Corrected an issue in which an error message ("Please enter only alphabets...") associated with Representations and Certifications questions 1 (FAR) and 27 (SF330 Part II) was incorrectly indicating that the user-entered data was invalid. Names with spaces will no longer trigger the error.	7020
Incremented the Representations and Certifications version to include changes to FAR provisions 52.212-3, 52.225-4, and 52.225-25, which accounts for November-December 2012 changes to the FAR. Reference FAR case 2012-30 and FAC 2005-62.	6921
Implemented revised SBA size standards. SBA has increased the small business size standards for several industries in Sections 51 and 56.	6943
Changed the logic for Representations and Certifications question 17 (pertaining to Small Disadvantaged Business selection) to reflect during guidance from GSA, OMB, and SBA. The user may now respond "Yes" to question 17 regardless of whether he/she has designated the entity as a minority-owned business in the Core Data section of the record.	7007
Updated the SAM user guide (PDF and HTML versions) to incorporate changes to (1) the logic surrounding Representations and Certifications question 17, and (2) the language regarding SBA supplemental pages.	7007, 7009
